Forwarding: Disable forwarding
 Forward a copy of incoming mail to and

Tip: You can also forward only some of your mail by [creating a filter!](#)

POP Download: [Learn more](#)

1. Status: POP is enabled for all mail that has arrived since 5/19/05
 Enable POP for **all mail** (even mail that's already been downloaded)
 Enable POP only for **mail that arrives from now on**
 Disable POP

2. When messages are accessed with POP

3. Configure your email client (e.g. Outlook, Eudora, Netscape Mail)
[Configuration instructions](#)

Make sure to Enable POP

1. Enable POP for all mail (even mail that's already been downloaded) or Enable POP only for mail that arrives from now on
2. Click Save Changes.

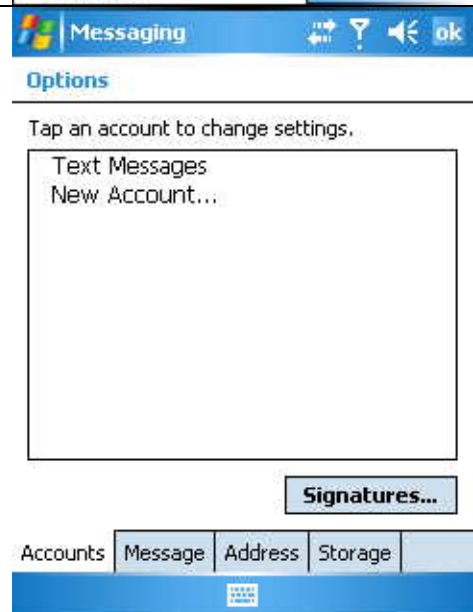

In the Home screen, select **Start**, and then tap **Messaging**

Tap on **Menu** located at bottom Left of your screen
Tap on **Tools**, Tap options or Tap New account

Tap **New Account**

- In "E-mail Setup (1/5)" window, enter your full email address (e.g., Deepak@gmail.com, and tap **Next**.

- In "E-mail Setup (2/5)" window, your device may perform an auto configuration

When completed, tap **Next**.

- In "E-mail Setup (3/5)" window, in "Your name" field, enter your name (e.g., Deepak Joshi)
- In "User name" field, enter your username (complete email address or just the First part of the mail address)
- In "Password" field, enter your account password

Check the Save Password box, and tap Next.

Back Finish

- In "Options (1/3)" window, configure how often you want the device to check for messages (e.g., **15** minutes) (Note: battery life decreases to less than a day with intervals under 15 minutes)
- Under Connection pop-up menu, select **The Internet**
- Tap **Next**

Messaging

Options (1/3)

Note that connecting automatically may result in higher connection charges.

Connect and check for messages every:

minute(s)

Connection:

Back Next

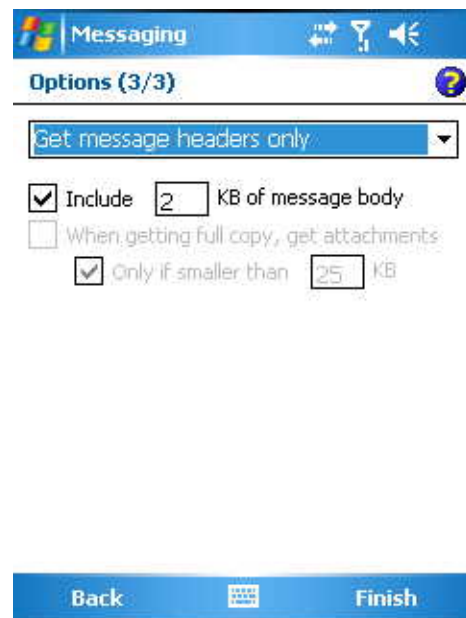

- In "Options (2/3)" window, configure how far back you want to check (e.g., 3 days)
- Check the **Require SSL connection** box
- Check the **Outgoing mail requires authentication** box
- Check **Use Separate Settings** box

Tap Next

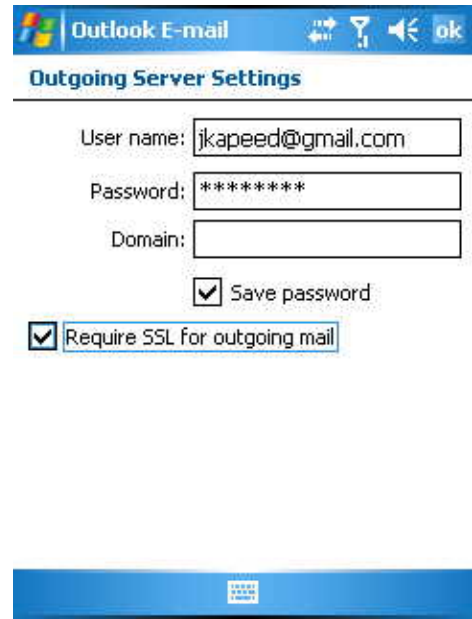

- In "Options (3/3)" window, select **Get message headers only** and **Include 2 KB of message body** (this will cut down how much data is downloaded)
- Tap **Finish**

When asked if you would like to download mail for this new account now, click **Yes**. Your email should begin downloading to the device.

- In "outgoing server setting window, in "Your user name" field, enter your gmail address (e.g., dipak@gmail.com)
- In "Password" field, enter your gmail account password

Check the Save Password box, and tap Next

The screenshot shows the "Outlook E-mail" window with the "Outgoing Server Settings" section. The "User name" field contains "jkapeed@gmail.com", the "Password" field contains "*****", and the "Domain" field is empty. The "Save password" checkbox is checked, and the "Require SSL for outgoing mail" checkbox is also checked. A blue bar at the bottom of the window contains the text "Next" and "Cancel".

Congratulation
